PUPPY SHOTS INFORMATION

Puppy Name: _____ **Puppy Date of Birth:** _____

<i>Puppy Age</i>	<i>Shots Due:</i>	<i>Shots Given:</i>
6 Weeks Old		
8 Weeks Old		
10 to 12 Weeks Old		
16 Weeks Old		

DO NOT GIVE YOUR SHAR-PEI THE LEPTO VACCINE OR LET ANY VET GIVE THIS VACCINE NO MATTER THE VETS OPINION. HAVE YOUR VET CALL ME IF THEY DON'T UNDERSTAND.

At 16 Weeks my Vet will give the puppies their last puppy shots. This includes Progard-5 (Distemper, Parvo.etc), Rabies, Bordatella(Kennel Cough) and also Microchip the puppy. **(No Lepto - Shar-Pei cannot have Lepto)**. Also at 16 weeks I start my puppies on Advantage multi for Heartworms. All of my puppies are Dewormed with Bravecto or Panacur C Canine Dewormer at 2,4,6 and 8 weeks old.

I personally give all my puppies their shots-because I do not want a Healthy Puppy to have to go to the Vet with all of the germs that are in the clinic. I feel safer if they have at least 3 Puppy Shots before they go to the Vet. I buy all of my Puppy Shots from my Vet. I do not buy my Puppy Shots from magazines. If you have any questions about this please feel free to call 601-731-1232.

I would ask that you take your puppy within 2 days to have your Vet examine your puppy to make sure that I have sold you or shipped to you a Healthy Puppy. If they have any questions - Please call me ASAP and/or call my Vet. I will take back any puppy that you feel that I have misrepresented in any way.

I stand behind all my dogs. Since there is no Test or Cure for the disease Amyloidosis, I will replace any puppy/dog that I have sold to you if the said dog/puppy dies from the disease Amyloidosis, PROVIDED that you keep in touch with me during the time that your dog is sick so that I can help make sure that the said dog is being treated the best that the dog can be treated. (If a dog lives to be 9-10 or older and dies of Kidney Failure (Amyloidosis) then that dog has lived to be of what is considered a long life for a Chinese Shar-Pei.)

Stay in touch with me if you have any kind of problems so I can correct them. I try to breed the best Shar-Pei possible and I would like a dog to have a second opinion when at all possible.

If a puppy receives the Lepto Vaccine then all guarantees are Null and VOID. The Lepto vaccine isn't considered a core or required vaccine for dogs. Shar-Per has been known to have fevers and other reactions to the Lepto Vaccine.
